INTRODUCTION

This inventory is an outgrowth of the Long-Range Study of Agricultural Research, published October 1966 as "A National Program of Research for Agriculture." The tables which follow are designed to assist those who will be carrying out the recommended "joint research program planning, evaluation, and coordination." It furnishes data for fiscal years 1968 and 1969 comparable to that published for 1966 and 1967 in "An Inventory of Agricultural Research, Volume I, June 1967."

The agricultural research inventory is presented in four tables that are published in two volumes. Table I, presented in Volume I, is divided into subtables for each of 96 problem areas. For 40 of the problem areas, sub-subtables are presented by commodities. Table I shows the contribution, in scientist man-years and dollars, of each performing organization to each of the problem areas or commodity subdivisions. The 96 problem areas appear in the table of contents.

The long-range study introduced a three-dimensional classification system that classifies all research by A - "Activity" or purpose, B - "Commodity or Resource," and C - "Field of Science" used in carrying out the work. The tables in Volume II are summaries for these three types of classification. The categories in the classification system are given on page viii of this publication.

The input unit was the "work unit" for the USDA and the "research project" for other institutions. Data for each work unit was submitted on Forms AD 416, 417, and 418, and for each research project on Forms AD 416, 417, and 419. (See pages vi, vii.)

Classification data is supplied on Form AD 417. Most inputs used only one line. For example, a project carried out by an entomologist on control of cotton insects would be coded:

"A"-5 (Insect control), "B"-21 (Cotton), "C"-4 (Entomology), "D"- 100% Problem Area 207 (Insect pests of field crops).

Some inputs (projects) could not be classified on a single classification "line." For example, a project carried out by a geneticist on breeding corn for disease resistance and improved yield would use two classification lines. If in the judgment of the person preparing the input form, three-fourths of the emphasis was on disease resistance and one-fourth on yield, the lines would be:

"A"-6 (Disease control), "B"-14 (Corn), "C"-5 (Genetics), "D" 75% 208 (Control of disease of field crops)

"A"-10 (Biol. efficiency), "B"-14 (Corn, "C"-5 (Genetics), "D" 25% 307 (Improvement of biological efficiency of field crops).

In the activity and problem area tabulations, 75% of the scientist man-years and of the funds reported for this project would be aggregated with other "disease control" projects and with other projects in the problem area "Control of diseases of field crops," and 25% would be aggregated with other "biological efficiency" projects and with other projects in the problem area, "Improvement of biological efficiency of field crops." In the commodity and resource tabulations, 100% of this project would be in "corn," and in the field of science tabulations it would all be in "genetics."

Abbreviations, Definitions, and Explanations - Table I

The first column, "PERFORMING ORGANIZATION," includes State names followed by "SAES" for State Agricultural Experiment Station. It also includes cities followed by "FRSTY SCH" for Forestry Schools and the names of other institutions followed by "OCI" for Other Cooperating Institution. Forestry schools not associated with a SAES are listed as "FRSTY SCH." Only those forestry schools receiving funds under provisions of the McIntire-Stennis Act are included in the inventory. Veterinary research at some universities is part of the State Agricultural Experiment Station programs and is included in SAES. In those universities where it is not part of the Experiment Station program, it was not inventoried.

The second portion of each subtable deals with the program of the research agencies of the U.S. Department of Agriculture. Headings indicate both the division doing the work and the State in which it is located, except that work performed at Beltsville and Hyattsville, Maryland, is separated from that conducted in cooperation with the Maryland State Station. The data that follows includes not only research conducted by the division but also research contracts and grants financed by funds appropriated to the division. For the USDA research divisions, the amount of funds and scientist man-years involved in the contracts and grants are reported in the year in which such funds are obligated, even though much of the actual work will be performed in future years. In estimating the obligations for FY 1969, a portion of the funds for contracts and grants had not been obligated when estimates were made. In these cases, no location is given. Following the entries covering the programs of USDA research agencies are the Special Research Grants made by the Cooperative State Research Service, USDA. These entries identify the State in which the grantee institution is located.

The final line in each subtable of Table I is a total for USDA, SAES, Forestry Schools, and Other Cooperating Institutions. As USDA contracts with SAES et al are reported by USDA as obligations (AD 416 - Field 19) and by the SAES and other institutions as expenditures (AD 419 - Fields 204 and 219), the scientist-man-years and funds reported by USDA agencies are not included in this total. This total is an addition of the SAES - FRSTY SCH - OCI total and the USDA total, minus the total reported by USDA agencies for contracts and grants with the SAES et al.

"NO OF PROJ," column 2, is number of project classification lines on the input units.

"SCIENTIST MAN-YEARS," columns 3 and 4, includes for SAES, Forestry Schools, and Other Cooperating Institutions all research workers who have a "rank" of assistant professor or above. It excludes graduate assistants and research administrators. For staff members engaged in research and teaching (or other non-research activities), only the full-time equivalent of the portion of time devoted to research is included. A count of the different individuals engaged in the program would be greater than the scientist-man-years reported. For USDA agencies, scientist-man-years include research workers whose rating is GS-11 or above. It does not include those with GS-7 or GS-9 ratings or those engaged in research administration. Scientists who start work after July 1 of the fiscal year, or whose employment is terminated before June 30, are reported for only that portion of the year which represents actual employment.

"REG FED APPR (CSRS ADMSTRD)," columns 5, 6, 7, and 8, means "Regular Federal appropriations (including those administered by the Cooperative State Research Service)." For USDA research agencies, including CSRS in the case of Special Grants, the amounts reported are the sums of the amounts in Fields 101, 104, 105, 106, and 107 of Form AD 418 plus the amount in Field 19 of Form AD 416 for grants and contracts in the year of obligation. The second portion of this heading, "(CSRS ADMSTRD)," applies only to Federal funds made available by CSRS to SAES, Forestry Schools, and Other Cooperating Institutions. For these institutions the amounts reported are the sums of the amounts in Fields 201, 202, 205, and 206 of Form AD 419.

"TOTAL FUNDS," columns 9, 10, 11, and 12. For USDA "TOTAL FUNDS" includes all funds under "REG FED APPR" plus "Other Federal Research Funds" as reported on Form AD 418 (excepting AID funds and PL 480 funds) plus "Non-Federal Research Funds" as reported on Form AD 418. For SAES, Forestry Schools, and Other Cooperating Institutions this includes "REG FED APPR" plus "Other Federal Research Funds" (excepting AID funds) as reported on Form AD 419 plus "Non-Federal Research Funds" as reported on Form AD 419.

"NET TO PROJ," columns 5, 6, 9, and 10, means "net to projects." These are the funds which are reported on Forms AD 418 and AD 419. "GROSS," columns 7, 8, 11, and 12, means "gross expenditures including funds not allocated to projects" in the case of USDA agencies. Funds not allocated to projects are prorated to all the projects reported by a Department agency. "Net" and "Gross" figures are the same for all research reported by the State Stations, Forestry Schools, and Other Cooperating Institutions. For SAES, administrative costs are shown separately under the label "Administrative Project" and appear at the head of the list of Research Problem Areas. The nature and amount of funds not allocated to projects varies among the Stations and USDA agencies. It usually includes administration, supervision, and personnel and financial services. It may include publications and statistical services, rent, operation of research farms, and other expenditures that relate to several or all projects.

"1968," columns 5, 7, 9, 11, and 15, means "dollars expended or obligated in fiscal year 1968" (July 1, 1967 to June 30, 1968). "M 1969," columns 6, 8, 10, 12, and 16, means "estimate in thousands of dollars of expenditures or obligations in fiscal year 1969" (July 1, 1968 to June 30, 1969).

"USDA CON GT CA WITH SAES," columns 13, 14, 15, and 16, means contracts, grants, and cooperative agreements under which the USDA uses Federally appropriated funds to pay State Experiment Stations, Forestry Schools, and Other Cooperating Institutions for the performance of specific research tasks. It includes CSRS "Special Grants" but not grants from other CSRS-administered funds. The manpower and fund data reported in these columns are also included in columns 3 to 12. State Experiment Stations, Forestry Schools, and Other Cooperating Institutions report expenditures of these funds in Fields 204 and 219 of Form AD 419. Scientist-man-years supported by these funds are not reported separately for SAES et al in columns 13 and 14 but are included in columns 3 and 4. USDA agencies treat each contract, grant, or cooperative agreement with a State Station as a separate work unit or project. The amounts included in columns 15 and 16 by USDA are reported in Field 19 of Form AD 416. They are reported in the fiscal year in which they were obligated. The SMY's in columns 13 and 14 are reported in field 95 of Form AD 416. This field shows the expected scientist-man-years to be "purchased," usually over a multi-year period, with the funds reported as obligated.

The totals for SAES-FRSTY-OCI and USDA shown at the bottom of each sub-subtable and each subtable have been adjusted to eliminate "double counting" of scientists and funds involved in USDA grants and contracts with SAES, Forestry Schools, and Other Cooperating Institutions. This is done by adding the SAES-FRSTY-OCI and USDA totals for columns 3 and 4 and subtracting USDA totals for columns 13 and 14; by adding SAES-FRSTY-OCI and USDA totals for columns 9 and 10 and subtracting USDA totals for columns 15 and 16; and by adding SAES-FRSTY-OCI totals for columns 11 and 12 and subtracting USDA totals for columns 15 and 16.
